

Playground Liquid De-Icer

PLAYGROUND LIQUID DE-ICER

DESCRIPTION

Playground Liquid De-icer is a liquid de-icer which starts to act the moment it is applied. It is easy and effective to use, as well as being environmentally friendly (biodegradable and non-toxic).

USES

Playground Liquid De-icer can be used either to clear existing ice (de-icing) or to prevent ice forming (anti-icing).

ADVANTAGES

- Acts immediately on contact
- Environmentally Friendly
- Prevents ice formation for 24-48 hours unless washed off
- Can be used on tarmac and EPDM wet -pour rubber crumb surfacing

INSTRUCTIONS FOR USE

To prevent ice forming, Playground Liquid De-Icer can be applied before a frost. This will prevent ice formation for 24 - 48 hrs unless washed from the treated surface. To apply, spread the product, undiluted over the specialist surface using a hand/industrial sprayer. We do not recommend the use of solvent based de-icer's, grit sand or salt be used on Playon or other EPDM wet-pour rubber crumb surfacing, as these may damage the surface and reduce the life expectancy of the system.

COVERAGE AND PACK SIZES

Tarmac - 10 litres will treat approximately 600m², when used as an anti-icing application and approximately 325m² when used as a de-icer.

Playon or other EPDM Wet-pour Rubber Crumb Systems - 10 litres will treat approximately 500m², when used as an anti-icing application and approximately 250m² when used as a de-icer.

Important Note: Playground Liquid De-icer is a non-toxic and non-hazardous product although there can be a slight odour following application however, this does not pose any risk to users. This product has been tested on a range of materials. For further information regarding the materials tested, please contact the Technical Department for further information.

Precautions - For further information on our precautions please see the MSDS.
