

Seef Tower, Bahrain

Jawad Plaza Complex, Bahrain

## CONREN INTERNATIONAL IN THE MIDDLE EAST

Our agents Bader Trading Co. continue to expand the impressive track record of work in Bahrain.

Two recently completed projects include the Seef Tower and Jawad Plaza Complex. Rooftex cold applied liquid compound has been installed to both sites to protect and waterproof the structures.

The high performance properties of Rooftex include exceptional elasticity, providing a highly effective waterproofing solution regardless of climatic conditions.

## SUPPORTING THE NORTH WALES WILDLIFE TRUST

CONREN continues to support the Wildlife Trust as a Corporate Member.

The Trust's Mr. R.G.Gibbs, (pictured left) presented the Corporate Members Certificate to Conren's Managing Director Chris McEwen who commented;

"As a manufacturing company, Conren has always taken a positive attitude to environmental issues." "North Wales is a beautiful area and we are lucky to have such a dedicated Trust working to preserve this for all to enjoy."

"2003 is the 40th birthday of the Wildlife Trust and Conren are pleased to be associated with the North Wales branch."

## RESILIENT RESIN FOR ROBINSONS

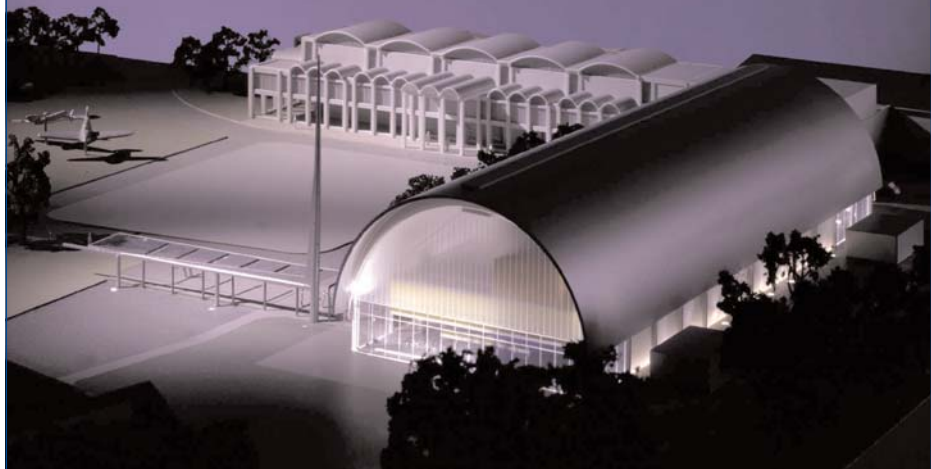

Conren squashed the competition to win the flooring at Robinsons Soft Drinks, the UK's biggest concentrated drink manufacturer.

1200m<sup>2</sup> of Levelay HDT epoxy resin screed has been installed at the new state-of-art bottle blowing plant in Norwich. The finished floor is totally impervious providing a hygienic, anti-slip, heavy-duty screed ideally suited to the needs of the process area.

Robinsons' Project Manager, Chris Spray, commented "Conren were recommended to us by our bottle supplier who were very complimentary about the quality and level of service offered. The programme was extremely tight and Robinsons are delighted by the outcome."

Levelay HD has an extensive track record of projects completed in the food and drinks industries.

## FLOORING 'FIELDS OF ENGLAND'

Work has recently been completed on a landmark building for the RAF Aircraft Museum at Hendon, North West London.

Levelay HD self-smoothing epoxy screed has been hand-laid by Conren's in-house Contracting Division to an intricate flooring pattern, depicting 'The Fields of England,' as a stunning back-drop to a unique display of vintage aircraft.

The high specification resin screed was specifically formulated in a range of subtle colours, to meet the Architect's concept design for the project, and laid in over 40 sections to a total area of approx 1600m<sup>2</sup>.

The exhibition hall, constructed by Norwest Holst Construction Limited, is due to be opened December 2003. The building complements the existing Grade II Listed museum and the project has received support from the Heritage Lottery Fund with a grant of £4.77 million.

## ARENA CENTRAL FOR CONREN

Conren Limited has been awarded the surface protection work to some 12,000 m<sup>2</sup> of car park at a prestigious new development at Arena Central in Birmingham.

Conren Congrip, heavy duty epoxy coating will be applied to the intermediate decks of the 4-storey car park to produce a colourful, slip resistant finish, defining car park bays and designated traffic routes. To aid pedestrian and wheelchair access, ramps will be formed in Tufcon 80 polymer screed.

The contract will also involve the installation of Decktect PU, a flexible polyurethane system, to provide an integrated waterproofing and anti-skid finish.

Finally, demarcation lines, directional arrows, and disabled symbols etc. will complete the project, with the installation carried out by Conren's in-house Contracting Division.

The car park forms part of a luxury residential and commercial development constructed by Laing/O'Rourke, due to be completed in February 2004.

## WALES SENIOR PRO-AM GOLF DAY

Bernard Dennis MBE, Conren's Export Sales Director (left) recently attended the Wales Senior Pro-Am Golf Day at the Royal St. Davids Golf Club, Harlech.
